- Case studies and storytelling
- Workshop design, coordination, and facilitation
- Operational learning
- IP and mission CLA capacity building
- Synthesis and evidence gathering
- Mission operations improvements
- Technical and logistical services
- Work-planning
- Workshop/ Event Space

USAID LEARNING ACTIVITY (ULA)

June 2019 – June 2024

The USAID Learning Activity (ULA) supports USAID/Uganda to strengthen its performance and improve the performance of its Implementing Partners, with a focus on collaborating, learning and adapting, in order to enhance the impact and sustainability of USAID-supported contributions to Uganda's development.

SYSTEMATIC LEARNING: ULA will use systematic learning, through applied research, monitoring and evaluation, to inform and improve the relevance, quality, and cost-effectiveness of programs and operations. ULA will further facilitate the adaptive management of program implementation and meta-level interventions to improve the quality of USAID program outcomes.

STRENGTHENED COLLABORATION: Through strengthened collaboration, both internally and with external stakeholders, ULA will enable USAID to better leverage expertise, learning, and resources and will deepen local ownership.

BROAD MISSION AND PARTNER SUPPORT ACROSS UGANDA: ULA will work across the country, frequently interacting with the USAID/Uganda mission, the project offices of various implementing partners, and various host country counterparts. ULA will support USAID/Uganda to extend its field presence and will have frequent field-based interaction with USAID activities and their host country counterparts throughout Uganda.
